

DataTracker

Monitor Fleet Performance and Save Money

When it comes to managing a fleet, ignorance is NOT bliss. It's one thing to know where vehicles are, but knowing how they are significantly improves fleet performance capabilities.

The GlobalWave DataTracker module gives you access to mission critical information that provides a competitive edge - saving time, money and increasing productivity.

Continually Monitor Engine Performance

DataTracker monitors engine performance standards and immediately notifies you of any irregularities.

Fault Code readings include;

- Oil Pressure and Temperature
- Coolant Level and Temperature
- Intake Manifold Temperature

Performance Reports

Managing your fleet performance has never been easier. The GlobalWave DataTracker module creates performance reports based on;

- Idle Times
- RPM's
- Odometer Readings
- Speed

Automated Fuel Tax Reporting

The GlobalWave DataTracker enables vehicles in your fleet to automatically generate time-stamped messages that record the odometer reading every time a state or province line crossing is made. Automated fuel tax reporting is provided to significantly streamline your fuel tax reporting process.

Benefits

100% satellite coverage means your vehicles are never out of touch.

Monitor drivers performance:

- idle times
- speed
- location

Continually monitors engine performance to let you know about problems before they become major issues.

Reduce downtime and maintenance cost.

Automatically log state line crossings to expedite fuel tax reporting:

- eliminate costly reporting errors
- save money
- save time
